Abstract

© 2015 Mediterranean Center of Social and Educational Research. All rights reserved. The subject of the research is the analysis of the main reasons for growth of number of accidents on roads. It has been made the assumption that it occurs in a consequence weakening of moral and ethical standards of modern drivers and not formation of subject identity. It has been allocated and described some shortcomings of the program of training of drivers. Results of the research allowed to define measures directed on increase of level of moral and ethical responsibility and formation at drivers of subject identity.
